THE BEST WARRANTY SELECTIONS
TO BACK UP YOUR INVESTMENT

CIRRUS. PLANE GENIUS™

WARRANTY FOR NEW AIRCRAFT

As a pledge to our customers, Cirrus offers outstanding warranties on all new Cirrus aircraft. The combination of sophisticated technology, performance, and quality has made Cirrus the most popular aircraft in its class.

The Cirrus Help Desk is available 24 hours a day; seven days a week to answer questions; diagnose problems, and dispatch parts.

The Cirrus Authorized Service Network of about 150 independently owned centers ensures that you get quality, convenient support where you need it, when you need it.

The Cirrus AOG (Aircraft on Ground) system can expedite parts and supply expertise wherever you may be from Manhattan to Madeira.

The CIRRUS WARRANTY program transparently offers an array of warranties for all customers – from new student pilot owners all the way through commercial operators. We also offer the opportunity to place an extended warranty on certain CIRRUS CERTIFIED™ aircraft.

STANDARD WARRANTY

Under the Limited Express Warranty – standard on all Cirrus aircraft - Cirrus warrants to you, the original owner of any new model Cirrus aircraft, that the aircraft and its equipment will be free from defects in material and workmanship under normal use and service for a period of twenty-four (24) months or 1,000 hours, whichever comes first. One thousand hours would be equivalent to more than five years of normal, personal use.

Major components are supported by their individual manufacturers with their dedicated, specialized service and support networks. These add to and enhance the Cirrus Network. For example, Cirrus uses engines manufactured by Teledyne Continental Motors with hundreds of locations available to you in its service network. These third-party suppliers provide the engine, propeller, and avionics.

If you should need any parts on your aircraft repaired or replaced, just visit your Cirrus Authorized Service Center. Repair or replacement of those parts will be made without charge.

EXTENDED WARRANTY

Does the use of your Cirrus aircraft require an extended warranty? For instance, do you use your Cirrus aircraft commercially in a flight school or air taxi operation? Cirrus also offers generous 36-month Extended Warranty Programs on all Cirrus aircraft. These can cover the standard 1,000 hours of operation or extend your support to 2,000 hours of use.

EXCLUSIONS

Like all good warranties, there are some common-sense exclusions. Obviously, accidents, negligence or misuse are excluded. Scheduled maintenance services such as cleaning, control rigging, brake adjustments and 100-hour or annual inspections are not included; nor are replacement of consumable items such as brake linings, filters, hoses, and tires. Read the complete warranty statements on cirrusdesign.com for all details.

CIRRUS WARRANTY

YEARS	HOURS	TYPE	COST
2	1,000	Standard Warranty	standard
3	1,000	Extended Warranty	\$5,995
2	2,000	Commercial Warranty	\$9,995
3	2,000	Commercial Warranty	\$13,995

Call toll-free 866.386.0725 to discuss your warranty needs.

PRE-OWNED CIRRUS AIRCRAFT

CIRRUS CERTIFIED™ is an alternative entry into the high performance luxury realm of Cirrus ownership at the reduced cost of a pre-owned aircraft. Just like with new Cirrus aircraft, we offer the same peace of mind through our warranty. Every CIRRUS CERTIFIED aircraft has our comprehensive factory inspection and a 100 day/50 hour warranty (whichever is greater), or the remainder of the original factory warranty. We certify in writing that the warranty is transferable. What this provides is confidence in buying pre-owned that cannot be had buying in the traditional used aircraft market. Aircraft purchased on the open used aircraft market may have a warranty limited to their original owner. If the CIRRUS CERTIFIED aircraft you're considering is less than two years old, Cirrus offers the option to purchase a 3rd year warranty for only \$5,995.
